

A photograph of a hiker from behind, walking on a wooden boardwalk that leads into a dense forest. The hiker is wearing a blue backpack, a red cap, and dark shorts. The boardwalk is made of light-colored wooden planks and is surrounded by lush green vegetation. In the background, there are tall trees and a dirt path. The overall scene is a natural, outdoor setting.

ALBERTA WATER COUNCIL 2012 ANNUAL REPORT

ABOUT THE ALBERTA WATER COUNCIL

The Alberta Water Council is a multi-stakeholder partnership that provides leadership, expertise and sector knowledge to engage and empower industry, non-government organizations, and governments to achieve the outcomes of the *Water for Life* strategy.

Created in 2004 under Ministerial Order by Alberta's then-Minister of Environment, the Council serves as a unique example of the concept of shared governance. It is one of three types of partnerships named under the *Water for Life* strategy; the others are Watershed Planning and Advisory Councils, and Watershed Stewardship Groups.

The Council regularly reviews implementation of the *Water for Life* strategy and champions the achievement of the strategy's goals. The structure of the renewed *Water for Life* strategy is based on a strong relationship between three goals:

- Safe, secure drinking water;
- Healthy aquatic ecosystems; and
- Reliable, quality water supplies for a sustainable economy.

These goals will be met through knowledge and research, partnerships, and water conservation.

The Council also advises the Alberta Government, stakeholders and the public on effective water management practices and solutions to water issues, as well as on priorities for water research. Where there is consensus, the Council may advise on government policy and legislation. However, the Government of Alberta remains accountable for the implementation of the *Water for Life* strategy, and continues to administer water and watershed management activities throughout the province.

The Council operates by consensus and is guided by an executive committee. It submits reports and recommendations directly to the Minister of Environment and Sustainable Resource Development and to other stakeholders. In November 2007, the Council was formally incorporated as a not-for-profit society under Alberta's *Societies Act*, with its own bylaws and governance structure. The Council receives an annual grant from the Government of Alberta to cover core operating costs and is responsible for its own financial management.

About this Report

This is the Council's eighth annual report. It summarizes activities for the calendar year 2012.

CONTENTS

- iv** Executive Summary
- 1** President's Message
- 3** Board Members
- 4** Executive Director's Message
- 7** Committee, Working Group and Project Team Members
- 8** Council Activities and Progress in 2012
- 11** Evaluating and Measuring Performance
- 13** Committees, Working Groups and Project Teams
- 17** In-Kind Contributions
- 18** Auditors' Report
- 19** Summarized Financial Statements — Alberta Water Council Association
- 21** Organizations
- 22** Other Resources

EXECUTIVE SUMMARY

This annual report describes the activities of the Alberta Water Council in 2012. A highlight for 2012 was the completion of the Council's fourth review of implementation progress of Alberta's *Water for Life* strategy. The recommendations from this review indicate that the actions identified previously are still appropriate and the Government of Alberta should continue its implementation efforts. The review also proposed that quantitative performance criteria and clear metrics for assessing progress be developed prior to the next Council review in 2015. The upcoming tenth anniversary of *Water for Life* is an opportunity for the Government of Alberta and all sectors to affirm their commitment to the strategy's direction.

Another major accomplishment this year was the completion of water conservation, efficiency and productivity plans by Alberta's major water-using sectors. The final three sectors presented their plans to the Board in 2012: Chemical Producers, Downstream Petroleum Products, and Power Generation. The Council recognizes the enormous amount of work that was required to produce these plans and commends all seven sectors for their effort. The Sector Planning for Water Conservation, Efficiency and Productivity project team will present its final report early in 2013.

The Non-Point Source Pollution project team continued its work to find better ways to manage total non-point source contaminant loadings in Alberta's watersheds. Two substantial consultant reports provided the foundation for the team's analysis to assess gaps and opportunities. The team engaged sectors twice in 2012, first to test the direction of potential recommendations, and then to get feedback on its draft report. The final report is expected early in 2013.

The Riparian Land Conservation and Management project team advanced its work this year and refined its ecological definition of "riparian lands." A comprehensive consultant report provided a great deal of information and, together with sector input, will help shape the team's advice. The final report in 2013 will include the definition and will address functions and values of riparian lands along with identified needs and gaps related to current understanding of riparian extent, health and management.

A new project was launched in 2012 to host a symposium on exploring water re-use for various applications. The symposium is expected to be of interest to many Council stakeholders and will be held in 2014.

Staff and board members remain active in their outreach within the province and elsewhere, sharing information about the Council and its consensus-based process. For more information on the Alberta Water Council, its publications and activities, please visit the Council's website at www.awchome.ca.

PRESIDENT'S MESSAGE

2012 was a very full year for the Alberta Water Council. Board members and their stakeholders were actively engaged in four separate areas to test ideas and potential recommendations emerging from project teams and committees. One of these activities was the Council's fourth review of implementation progress of the *Water for Life* strategy, which will celebrate its tenth anniversary in 2013. After a decade, the strategy continues to be relevant and provides effective guidance to users and managers of Alberta's water resources. Nevertheless, much remains to be done, and providing advice on the implementation progress of *Water for Life* is an important part of the Council's mandate.

We were also extremely pleased to see the completion of the last three water conservation, efficiency and productivity sector plans. All seven major water-using sectors — accounting for most of the water allocated in the province — now have voluntary plans in place. This is a significant achievement and reflects the commitment by sector organizations in developing the plans, and by their members in implementing them. Progress Reports from all sectors are expected in the next couple of years.

The Council is also in the final stages of work on two other challenging topics: non-point source pollution, and riparian land conservation and management. Work in both of these areas is laying a solid foundation for further activity by all stakeholders. Our consensus-based process has been an important factor in finding common ground and reaching agreement on how to strengthen efforts in these areas.

The Government of Alberta's decision to amalgamate two key departments in 2012 — Environment and Water, and Sustainable Resource Development — reflects a desire to better integrate renewable resource management. We look forward to establishing new relationships and strengthening existing ones in the coming years as the new department continues to work with and seek advice from the Council.

Finally, I am delighted to take on the role of Council President. This organization has demonstrated considerable depth of knowledge and expertise on water matters, as well as a remarkable, sustained commitment to finding pragmatic and creative solutions. I value these attributes and look forward to working with you to achieve our shared goals.

Dana Woodworth

BOARD MEMBERS

The following were board members as of December 31, 2012, and all gave generously of their time and expertise to advance the Council's work this year.

BROAD CATEGORY	DIRECTOR	ALTERNATE
INDUSTRY		
Chemical and Petrochemical	John Skowronski *	Al Schulz
Cropping	Elaine Bellamy	Sharon McKinnon
Forestry	Keith Murray	Dan Moore
Irrigation	Ron McMullin	Richard Phillips
Livestock	Stuart Thiessen	Doug Sawyer
Mining	Chris Fordham	Stuart Lunn
Oil and Gas	Lars DePauw	Tara Payment
Power Generation	Jim Hackett	
NON-GOVERNMENT ORGANIZATION		
Environmental	Carolyn Campbell	Bob Cameron
Environmental	Jason Unger	Maureen Bell
Fishery Habitat Conservation	Jeff Surtees	Peter Aku
Lake Environment Conservation	Jay White*	Judy Stewart
Watershed Planning and Advisory Councils	Ken Brown	
Wetland Conservation	Perry McCormick	Tracy Scott
GOVERNMENT OF ALBERTA AND PROVINCIAL AUTHORITIES		
Alberta Agriculture and Rural Development	Colin Jeffares	Jamie Wuite
Alberta Energy	Martin Chamberlin	Audrey Murray
Alberta Environment and Sustainable Resource Development	Dana Woodworth*	Beverly Yee
Alberta Health	Dawn Friesen	Jenny Hong
Alberta Innovates – Energy and Environment Solutions	John Zhou	
OTHER GOVERNMENT		
Large Urban	Rob Pritchard*	Mark Brostrom
Métis Settlements	Mary Onukem	
Rural	Al Kemmere	Bob Barss
Small Urban	Janelle Saskiw	Rachel Bocock
EX-OFFICIO	Gordon Edwards*	

* Executive member as of December 31, 2012.

The Council gratefully acknowledges the following individuals who stepped down in 2012:

DIRECTORS:

Neil Boyd, Les Gammie, Ray Gilmour, David Hill, Ernie Hui, John Kolk, Robert L'Hirondelle, Louis Pawlowich, Richard Quail, Jennifer Steber

ALTERNATES:

Rick Istead, Debra Mooney, Evelynne Wrangler

EXECUTIVE DIRECTOR'S MESSAGE

Once again, the Council had a busy year, combining our core business activities with a number of operational enhancements to improve governance and program delivery.

Among these was a system to track implementation of Council recommendations, which will be refined in 2013 in light of our experience. As well, our Process Guidelines were updated to identify and fill procedural gaps and ensure consistency of information and practices for all those participating in Council work. At the request of the Board, staff developed several self-assessment tools to assist Members in improving involvement and lines of accountability, and these are now in use.

Considerable staff time was devoted to planning and then to supporting team members as they undertook stakeholder engagement activities for several projects this year. The results were very positive and it was gratifying to see so many individuals and organizations contributing to our work. The next year also promises to be busy, as the Board approved two exciting statements of opportunity: one on aquatic invasive species and one for a symposium, to be held in early 2014 on water re-use for household, municipal and industrial applications. Conferences represent a new niche for the Council and will be a good way to extend our outreach to an even broader audience. Other project ideas are still being developed and we await their presentation to the Board.

As is the case every year, we receive many invitations to share our process and results with Alberta's water stakeholders. It is always a pleasure to accept these invitations and talk about our activities. I remain deeply impressed by the continuing engagement of our Board and teams and the dedication of our staff. It was also a pleasure working briefly with past president Ernie Hui and I look forward to the coming year under the leadership of Dana Woodworth.

Gordon K. Edwards

OUR TEAM AS OF DECEMBER 31, 2012

Executive director – Gordon Edwards

Senior project manager – Terry Sly

Project managers:

Andre Asselin

Alesha Hill

Meredith Walker

Office manager – Jennifer Beepat

Contractors:

Accounting – Sunny Yeung

Project management – Petra Rowell

Policy and communications – Kim Sanderson

COMMITTEE, WORKING GROUP AND PROJECT TEAM MEMBERS

The following individuals contributed their time and expertise to Council committees, working groups and project teams in 2012, and the Council gratefully acknowledges their commitment and support. This list also includes individuals who led or helped to prepare statements of opportunity for projects the Council considered in determining its future work. The Council also thanks the many other individuals from various stakeholder groups who reviewed documents, responded to surveys, and volunteered their time in support of our activities.

COUNCIL ACTIVITIES AND PROGRESS IN 2012

This year, the Council continued operations under its 2010-2013 business plan. Each of the plan's three areas of core business has a specific goal and several strategies to achieve the goal. Activities in 2012 supported progress in all three core businesses and goals, as reflected in the chart below. The areas of Council activity for 2012 are described in more detail later in this report, under the work of the appropriate committee, working group or project team. This was the first full year for which performance measures were assessed and reported on, as noted in the next section of this report.

3

CORE BUSINESS

Provide a Forum for Discussion and Resolution of Water Issues

GOAL

Alberta Water Council has an effective process for sectors to discuss and resolve water management issues.

PERFORMANCE MEASURES

- A. Percentage of directors satisfied that the Council's processes and communications are addressing the needs of the board.
- B. Percentage of identified process gaps being appropriately addressed within six months of coming to the Council's attention.

AREAS OF COUNCIL ACTIVITY IN 2012

- Sector Planning for Water Conservation, Efficiency and Productivity
- Communications
- Symposium on Exploring Water Re-use for Household, Municipal and Industrial Applications

In March 2012, the Board approved a system for tracking implementation of Council recommendations. This entailed compiling a Detailed Tracking Report along with a Board Update Report to reflect successes, challenges and general progress for each project. The system for tracking implementation of Council recommendations was piloted in 2012 with semi-annual updates provided to the Board in March and October. This approach will be refined in 2013 based on experience with the pilot.

A year of experience with the system suggested that reporting annually would just as effectively track implementation progress and would be more efficient in terms of time and effort for both staff and implementation coordinators. The shift to annual reporting is expected to occur in 2013.

Also this year, two new initiatives were approved, based on statements of opportunity submitted by the Government of Alberta. The first was a symposium planned for early 2014 to look at water re-use for household, municipal and industrial applications. The second project, to be launched in March 2013, will explore how to safeguard Alberta's water supplies and ecosystems from aquatic invasive species.

EVALUATING AND MEASURING PERFORMANCE

The Alberta Water Council agrees that “what gets measured gets done” and has established a system for measuring and evaluating performance against the Council’s goals.

Setting Priorities

Every three years, the Board re-visits its Business Plan, ensuring the appropriate goals and strategies are in place to achieve its mandate. In 2012, Board members participated in a strategic planning exercise to identify and select new work to advance its three goals.

Performance Measures

Performance measures demonstrate to the Council, stakeholders and the public that the three goals are being achieved. The Council has five performance measures, one for the first goal and two each for goals 2 and 3. The Executive Committee, on behalf of the Board evaluates and reports on the Council’s performance each year. This is the first year of reporting on performance measures.

1

GOAL 1

The implementation of the *Water for Life* Strategy is reviewed in a timely and thorough manner.

»»

PERFORMANCE MEASURE 1A: Percentage of Alberta Water Council members contributing to the *Water for Life* Implementation Review report, which is due 18 months after the period under review.

Target: 90% of Council members contribute to the *Water for Life* Implementation Review report.

Results: 100% of Council members contributed to the development of this report. As part of the review process, a number of members or their designates participated on the committee that prepared the report, key Government of Alberta staff were interviewed to provide the committee with information on implementation progress and

challenges, and an online survey was completed by Member or sector representatives to learn about activities of sectors in addition to the Government of Alberta in support of the *Water for Life* strategy.

2

GOAL 2

Alberta Water Council’s policy recommendations are timely, based on credible information, implementable, have consensus and support *Water for Life* goals and timelines.

»»

PERFORMANCE MEASURE 2A: Percentage of projects completed in the timeline prescribed in the approved project terms of reference.

Target: 100%

Results: Of the four active Council projects, the *Water for Life* Implementation Review was the only project scheduled for completion in 2012. The Committee requested and was granted an extension to the timelines in its terms of reference; therefore the 100% target was met.

»»

PERFORMANCE MEASURE 2B: Percentage of issues identified by Alberta Water Council project teams addressed with consensus recommendations.

Target: 85%

Results: The *Water for Life* Implementation Review Committee was the only team to complete its work in 2012. The report included 10 recommendations and no outstanding issues needed to be addressed, therefore we interpret that 100 % of identified issues were addressed with consensus recommendations.

3

GOAL 3

Alberta Water Council has an effective process for sectors to discuss and resolve water management issues.

PERFORMANCE MEASURE 3A: Percentage of directors satisfied that the Alberta Water Council's processes and communications are addressing the needs of the board.

Target: 85% of directors are satisfied with the communications strategy and its implementation.

Results: Directors were surveyed and 100% of the Directors or their designates responded and expressed satisfaction with the implementation of the communications strategy.

PERFORMANCE MEASURE 3B: Percentage of identified process gaps being appropriately addressed within 6 months of coming to the Alberta Water Council's attention.

Target: 100%

Results: The target of 100% was met. In 2012 the Council undertook a detailed review of its Process Guidelines in accordance with its 3-year cycle. A number of gaps were identified and addressed during the review. The Board approved the revised Process Guidelines in October 2012.

An issue arose around the posting of third party documents on the Council's website. The issue was reviewed by the Executive Committee at a subsequent meeting and an interim policy was developed and later included in the Process Guidelines.

COMMITTEES, WORKING GROUPS AND PROJECT TEAMS

Committees, working groups and project teams are where much of Council's substantive work is done. Like the Council, these multi-stakeholder bodies make decisions by consensus.

Committees are typically formed to deal with administrative matters and often carry on their work from year to year.

Working groups are formed when the Council decides that more detailed work is needed in an area. The main purpose of a working group is to scope the issue and recommend how it could be addressed. This usually involves preparing terms of reference for a project team.

Project teams are established to investigate particular water issues thoroughly and come back to Council with a report and recommendations. Terms of reference for each team are available on the Council's website.

This section briefly describes the accomplishments of each committee, working group and project team, and explains how their work fits within the Council's Business Plan by noting the specific strategy the work supports.

Reports from Council teams are available online at www.awchome.ca.

Committees

EXECUTIVE COMMITTEE

The Council is guided by a five-person Executive Committee, which includes a member from each of the four broad categories plus the executive director. The Executive Committee provides financial and statutory oversight on behalf of the Board, sets the agenda for each board meeting, and responds to issues that arise between meetings, giving guidance to staff or handling the matter directly, as appropriate. Executive members liaise with Ministers and monitor the Board's effectiveness and adherence to Council policies and procedures. Along with Council Directors, they also communicate with the media when required. As well, the Executive Committee leads communications, strategic and business planning activities. Implementation of the Communications Strategy and Action Plan continued through 2012, using various tools to strengthen the Council's communications activities.

Several areas of specific work were identified in 2011 and completed in 2012:

- The Membership Review Sub-committee made eight recommendations that were subsequently approved by the Board in March 2012. The sub-committee concluded that membership is generally adequate to meet Council's needs, but lines of accountability could be improved; staff were asked to develop several self-assessment tools to assist Members in making these improvements.
- In response to recommendations from the Sustainable Funding Sub-committee, the Executive oversaw development of a business case for Council holding conferences; the concept was adopted by the Board in October and will be pursued in 2013.

Additional areas of focus for the Executive Committee this year included:

- Overseeing the three-year review of Council's Process Guidelines. This review ensures a) that any procedural gaps are identified and addressed in a timely manner, b) consistency of information and practices at the team and Board level, and c) alignment with any changes to the Council's mission and goals.
- Organizing a strategic planning workshop to, among other things, explore opportunities to broaden the suite of Council products and services and identify potential new work for the next year.

WATER FOR LIFE IMPLEMENTATION REVIEW COMMITTEE

One of the Council's most important tasks is to regularly review implementation progress of the *Water for Life* strategy. The reviews are conducted at a strategic level, focusing on emerging water issues and concerns in the province and the effectiveness of the *Water for Life* strategy in addressing them. They are done in a spirit of adaptive management in which the regular evaluation of progress highlights strengths, identifies weaknesses and recommends areas where additional focus would enable the strategy to advance more effectively. Each review assesses the status, effectiveness and

progress of implementation activities and provides advice for improvement based on the assessment. Previous reviews were conducted in 2005, 2007 and 2009.

Completed and publicly released in 2012, the fourth review provides a snapshot of the strategy's status, effectiveness and progress as of December 31, 2011. In its review, the committee considered documents relevant to the strategy, interviewed appropriate Government of Alberta staff and surveyed Council stakeholders and Alberta's watershed stewardship groups, using the results to develop ten recommendations.

Nine of the recommendations emphasize various aspects of each goal and key direction in the strategy. In general, they indicate that the actions in the 2009 Action Plan are still appropriate and needed to achieve the strategy's outcomes, and that the Government of Alberta should continue its implementation efforts. The tenth recommendation specifically addresses an area not previously identified: it proposes that the Government of Alberta develop quantitative performance criteria and clear metrics for assessing progress toward *Water for Life* goals and key directions prior to the next Council review in 2015.

The review acknowledges the substantial implementation progress made to date but notes that much work remains to be done to maintain momentum. The upcoming tenth anniversary and expected renewal of the *Water for Life* strategy in 2013 provide an opportunity for the Government of Alberta and all sectors to affirm their commitment to the strategy's direction.

2013 SYMPOSIUM STEERING COMMITTEE

In October, the Board approved a statement of opportunity presented by the Government of Alberta to host a symposium on water re-use for various applications. A steering committee was established in December to further discuss and refine the topic and timelines. The symposium is expected to be of interest to many Council stakeholders and will be held in 2014.

Working Groups and Project Teams

SECTOR PLANNING FOR WATER CONSERVATION, EFFICIENCY AND PRODUCTIVITY

The *Water for Life Action Plan* (2009) calls for water conservation, efficiency and productivity (CEP) plans to be prepared by all major water-using sectors. This team has promoted and assisted the development of CEP sector plans by seven major water-using sectors that account for most of the allocated water in Alberta. The Council recognizes the enormous amount of work that was required to produce these plans and commends all seven sectors for their efforts. The final three sector plans were completed and presented to the Board in 2012: Chemical Producers, Downstream Petroleum Products and Power Generation.

The plan from the Chemical Producers identified ten opportunities for CEP improvements; these opportunities focus on process control and quality maintenance, and some opportunities are already being implemented. As part of continuous improvement, small incremental measures will be implemented to reduce unnecessary wastage from process leaks and to enhance water use efficiency. The most significant improvements in water use in the chemistry industry will occur with major capital investments related to stock turnover or expansion. This allows older, less efficient equipment to be taken out of service and replaced with current technology resulting in greater efficiency and productivity.

The plan for the Downstream Petroleum Products sector identified 15 opportunities for a potential of 22 CEP outcomes:

- Nine conservation opportunities that may decrease overall water use (e.g., alternative water sources);
- Eight efficiency opportunities that may decrease overall consumptive water use by reducing water losses to the atmosphere and/or increase the volume of water discharged back to the source; and
- Five productivity opportunities that may increase production while maintaining the same amount of water used.

The Power Generation plan notes that water CEP improvements in this sector have already taken place. Process improvements, technology improvements and the replacement of aging facilities have influenced and are expected to continue to influence water use. A key challenge will be the interrelationships between regulatory objectives (e.g., air emission controls could lead to increased water consumption). Water productivity improvement over the base period (2000-2002) is projected to be 31% by 2015 and 50% by 2029. Water consumption is expected to stay about the same until 2030, despite projected doubling of electricity demand. Total water consumption is expected to grow 2% by 2015 and 8% by 2029.

By the end of 2012, the team had put a great deal of effort into preparing its final report, but requested and received an extension to its timelines. A final report and recommendations are expected in early 2013. With the completion of the sector CEP plans, the next phase of work will entail monitoring and evaluating progress. All sectors have committed to implementing their plans and reporting progress to the Alberta Water Council. Each sector plan has its own performance measures on which it will report; these will be used to evaluate progress and performance and to determine the overall contributions of sectors to meeting the *Water for Life* goals and key directions.

NON-POINT SOURCE POLLUTION

The Non-Point Source Pollution project team was established to make recommendations on how to better manage total non-point source contaminant loadings to achieve *Water for Life* goals. This involved developing a working definition of non-point source (NPS) pollution; understanding the “state of” NPS pollution knowledge, particularly in Alberta; and examining the tools that characterize and aid in the management of NPS pollution. Phase I to assess the state of knowledge of NPS pollution of surface water in Alberta was completed in 2011.

Phase II, which focused on management approaches, was finished in early 2012. The consultant’s report for Phase II reviewed legislated requirements and voluntary best (or beneficial) management practices for addressing NPS pollution in Alberta, three other Canadian provinces, six U.S. states and three European countries for five major land uses: agriculture, urban, forestry, oil and gas, and recreation. Drawing on the experience of other jurisdictions, the report outlined 12 key components of an effective NPS pollution program and identified ways in which Alberta might approach a program of its own.

The phase I and II consultant reports provided the foundation for the team’s analysis during the development of the final report. This analysis assessed gaps and opportunities and led to draft recommendations to advance efforts to better manage NPS contaminant loadings in Alberta watersheds.

The complex nature of NPS pollution and its management resulted in many challenging discussions both within the team and during its conversations with stakeholders. The team engaged sectors twice in 2012, first to test the direction of potential recommendations, and then to get feedback on the draft report. The consultant reports were circulated to stakeholders as information. By the fall, the team realized it would need a little more time to complete its final report and recommendations, and the terms of reference were amended to enable the team to conclude its work in early 2013.

RIPARIAN LAND CONSERVATION AND MANAGEMENT

The objective of the Riparian Land Conservation and Management project team is to enhance knowledge and recommend ways to effectively conserve and manage riparian lands in support of *Water for Life* goals. An important component of the team’s work is to develop a common ecological definition that could be used across all sectors to clearly identify and gain agreement on what comprises “riparian lands.” The team undertook considerable consultation on the definition in 2012 and is hopeful that it will be approved in early 2013.

Other key tasks for the team included documenting the state of riparian lands, management and stewardship in Alberta along with best practices in other jurisdictions; evaluating the state of riparian lands, management and stewardship against the needs of all relevant sectors; and recommending ways to improve riparian land conservation and management in Alberta.

A consultant was engaged to prepare a background report for the team. Entitled *Riparian Lands in Alberta: Current state, conservation tools, and management approaches*, this comprehensive document was based on extensive research and a survey of experts, and provided a great deal of valuable information that identified what is working well, what needs improvement and barriers to improved management and conservation. It also suggested a number of strategies and approaches that could be considered to improve management and conservation of riparian lands.

The team’s final report and recommendations are expected in 2013; in addition to the definition, the report will address functions and values of riparian areas along with identified needs and gaps related to current understanding of riparian extent, health and management.

IN-KIND CONTRIBUTIONS

In-kind support is a cornerstone of the Council's ability to address complex water management issues and is extremely valuable in helping the Council to complete its work.

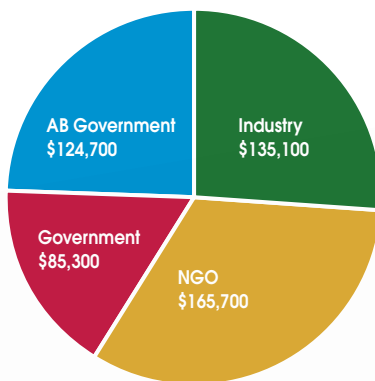

Industry, government and non-government organizations have all provided such support, largely through the participation of their staff. A number of organizations have also hosted meetings and other events. The Council has tried to assign a dollar value to this support by examining time and travel costs and other contributions, but can confidently say that the true value of these contributions is both under-recorded and underestimated.

The total in-kind contributions of time for 2012 amounted to more than 4,700 hours, which represents nearly \$445,000 in donated time. The chart shows these in-kind contributions from the four broad stakeholder categories.

Ducks Unlimited Canada is acknowledged for hosting the wetland field trip and barbecue in June, and the Canadian Fuels Association contributed to the Council's recognition event in October. In addition to these contributions and those noted in the chart, the Government of Alberta provided office space to the Council in 2012.

The Alberta Water Council gratefully acknowledges all the generous contributions it has received from its stakeholders.

REPORT OF THE INDEPENDENT AUDITOR ON THE SUMMARY FINANCIAL STATEMENTS

To the Directors Alberta Water Council Association

The accompanying summary financial statements, which comprise the summary statement of financial position as at December 31, 2012, the summary statement of operations, and the summary statement of changes in net assets for the year then ended, are derived from the audited financial statements of the Alberta Water Council Association for the year ended December 31, 2012. We expressed an unmodified audit opinion on those financial statements in our report dated February 21, 2013. Those financial statements, and the summary financial statements, do not reflect the effects of events that occurred subsequent to the date of our report on those financial statements.

The summary financial statements do not contain all the disclosures required by Canadian accounting standards for not-for-profit organizations. Reading the summary financial statements, therefore, is not a substitute for reading the audited financial statements of the Alberta Water Council Association.

Management's Responsibility for the Summary Financial Statements

Management is responsible for the preparation of a summary of the audited financial statements in accordance with Canadian accounting standards for not-for-profit organizations.

Auditors' Responsibility

Our responsibility is to express an opinion on the summary financial statements based on our procedures, which were conducted in accordance with Canadian Auditing Standard 810 — *Engagements to Report on Summary Financial Statements*.

Opinion

In our opinion, the summary financial statements derived from the audited financial statements of the Alberta Water Council Association for the year ended December 31, 2012 are a fair summary of those financial statements, in accordance with Canadian accounting standards for not-for-profit organizations.

NET ASSETS — END OF YEAR	<u>\$ (7,440)</u>	<u>\$ 7,940</u>	<u>\$ 500</u>	<u>\$ 500</u>

ORGANIZATIONS

The following organizations supported the Alberta Water Council through their generous in-kind contributions in 2012. These commitments have been instrumental in helping the Council undertake its work and are deeply appreciated. The Council also values the contributions from the many organizations that have been engaged behind the scenes and are too numerous to track.

Alberta Agriculture and Rural Development	City of Edmonton
Alberta Association of Municipal Districts and Counties	Clearwater County
Alberta Beef Producers	ConocoPhillips Canada
Alberta Canola Producers Commission	Crop Sector Working Group
Alberta Chamber of Resources	Ducks Unlimited Canada
Alberta Conservation Association	Environmental Law Centre
Alberta Energy	Environment Canada
Alberta Environment and Sustainable Resource Development	EPCOR Water Services
Alberta Environmental Network	Esso Imperial Oil Resources
Alberta Forest Products Association	Fish Habitat Conservation Collective
Alberta Health	Highwood Water Management Planning Public Advisory Committee
Alberta Innovates – Energy & Environmental Solutions – Water Resources	Hinton Wood Products Woodland A Division of West Fraser Mills Ltd.
Alberta Irrigation Projects Association	Intensive Livestock Working Group
Alberta Lake Management Society	Land Stewardship Centre of Canada
Alberta Newsprint Company	Lesser Slave Watershed Council
Alberta Pulse Growers	Métis Settlements General Council
Alberta Riparian Habitat Management Society – Cows and Fish	Mighty Peace Watershed Alliance
Alberta Transportation	Milk River Watershed Council Canada
Alberta Urban Municipalities Association	Mountain View County
Alberta Wilderness Association	Municipal District of Wainwright
Alberta Winter Wheat Producers Commission	Natural Resources Conservation Board
Agri-Environment Services Branch, Agriculture and Agri-Food Canada	North Saskatchewan Watershed Alliance
Aquality Environmental Consulting Ltd.	Oldman Watershed Council
Aquatera Utilities Inc.	Penn West Energy Exploration
ATCO Power Ltd.	Red Deer River Watershed Alliance
Athabasca Watershed Council	South East Alberta Watershed Alliance
Battle River Watershed Alliance	South Peace Environmental Association
Beaver River Watershed Alliance	Suncor Energy
Bow River Basin Council	Sustainability Resources Ltd.
Bow River Irrigation District	Taber Irrigation District
Canadian Association of Petroleum Producers	Town of Okotoks
Canadian Fuels Association	TransAlta Corporation
Chemistry Industry Association of Canada	Trout Unlimited Canada – Alberta Chapter
City of Brooks	Village of Marwayne
City of Calgary	Water Conservation Trust of Canada

OTHER RESOURCES

The Alberta Water Council's reports can be obtained from the Council's website or on request to Council staff. Other agencies and organizations have published materials that have been useful to the Council and may be of interest to readers. Some of these are noted below.

ALBERTA WATER COUNCIL DOCUMENTS

The following documents are available on the Alberta Water Council website at www.awchome.ca

- *Moving from Words to Actions – Recommendations to improve communication, coordination and collaboration between and among Water for Life partnerships* (2011)
- *Consensus Decision-Making Toolkit* (2010), published with the Clean Air Strategic Alliance
- *Provincial Ecological Criteria for Healthy Aquatic Ecosystems: Recommendations from the Alberta Water Council* (2009)
- *Recommended Projects to Advance the Goal of Healthy Aquatic Ecosystems* (2009)
- *Recommendations for Improving Alberta's Water Allocation Transfer System* (2009)
- *Healthy Aquatic Ecosystems – A Working Definition* (2008)
- *Water for Life, Recommendations for Renewal* (2008)
- *Intra-Basin Water Movement: Major Principles and Recommendations* (2008)
- *Recommendations for Water Conservation, Efficiency and Productivity Sector Planning* (2008)
- *Strengthening Partnerships: A Shared Governance Framework for Water for Life Collaborative Partnership* (2008)
- *Recommendations for a New Alberta Wetland Policy* (2008)
- *Recommendations for an Alberta Wetland Policy Implementation Plan* (2008)
- *Recommendations for a Watershed Management Planning Framework for Alberta* (2008)
- *Intra-Basin Water Movement Inter-jurisdictional Research Report* (2008)
- *Water Conservation, Efficiency and Productivity: Principles, Definitions, Performance Measures and Environmental Indicators* (2007)
- *Water Policy Issues and Gaps* (2007)
- *Review of Implementation Progress of Water for Life, 2009-2011* (2011)
- *Review of Implementation Progress of Water for Life, 2006-2008* (2009)
- *Review of Implementation Progress of Water for Life, 2005-2006* (2007)
- *Review of Implementation Progress of Water for Life, 2004/2005* (2005)
- *2010-2013 Business Plan* (2010)
- *Water Research Strategy* (2006), published by the Alberta Science and Research Authority

- *Alberta Water Council 2004 – 2005 Annual Report*

WATER CONSERVATION, EFFICIENCY AND PRODUCTIVITY (CEP) SECTOR PLANS

Alberta's seven major water-using sectors have prepared CEP plans. These plans were voluntarily prepared and subsequently adopted by their respective sector organizations. In accordance with the Council's Framework for sector plan development, the completed CEP plans were presented to the Council for information only, not for approval or endorsement. The original plans are available on the Council's website at www.awchome.ca/Projects/WaterCEP/tabid/115/Default.aspx
